

Criteria for the certification of cosmetics

Cosmetics are for example

- Creams, lotions, gels and oils for skin care
- Make-up bases (liquids, pastes, powders)
- Toilet soaps
- Perfumes, eau de toilette, cologne
- Hair treatment agents such as dyeing and decolorizing agents, styling auxiliaries such as lacquers, gels, foams
- Deodorants and antiperspirants
- Lip care stick
- Make-up and make-up removal agents
- Dental and oral hygiene products
- Sunscreen products

The following is checked:

Cosmetics which remain on the skin ("leave-on" products), do not contain any of the possible allergenic substances or compounds listed in the table below in a concentration above 0.0001% as well as no preservatives splitting off halogens (organic halogen compounds) and thiazolinones.

Cosmetics which are rinsed off ("rinse-off" products) and cleaning agents do not contain any of the possible allergenic substances or compounds listed in the table below in a concentration above 0.001%.

An allergen management according to the specifications of a HACCP concept is operated.

The Allergy Seal of Quality is by no means a general safety certificate. The manufacturer or distributor determines which products should be certified and has them checked by Service Allergie Suisse SA. Consumers will then find this information on the packaging of the product and in the product database of Service Allergie Suisse.
